

**Amendment to the Drawings:**

Please replace Drawing Sheet 4/6 (containing Fig. 4) with the Replacement Sheet which accompanies this Reply.

## REMARKS

Entry of this amendment to Drawing Sheet 4/6 (containing Fig. 4) under 37 C.F.R. §1.312 is solicited on the basis that the correction merely correct an error in Figure 4. This amendment was entered during Interference No. 105,373, on December 16, 2005. However, no record of this amended drawing appears in the prosecution history. Thus, this amendment is submitted to enter the corrected drawing into the prosecution record.

Figure 4, which appears on Drawing Sheet 4/6, has been amended to correct two errors. Both occur on the 1,3-bis(2,4,6-trimethylphenyl)imidazo-l-2-ylidene, or IMes, ligand. In particular, the line that erroneously shows a connection between one of the methyl groups of the mesityl group and the nitrogen of the imidazole ring has been deleted, and an erroneously omitted line has been drawn between two carbon atoms of the aromatic ring of the mesityl group. Support for the amendment to the drawing is found in the Specification at least at Page 3, lines 31-32, Page 9, lines 21-25, and Figure 2B. No new matter is believed to be added by this amendment to the Drawings. An annotated sheet showing the changes to Figure 4 accompanies this amendment.

Favorable action on this amendment is solicited. If any other matter remains unresolved, the Office is invited to phone the undersigned so that such matter can be addressed and, if possible, promptly resolved.

Respectfully submitted,

/Mary H. Drabnis/
